ACCU Slide Series Features and Benefits 33

ACCU Gantry Series Features and Benefits 34

The **Accu A Series** is an aluminum NFPA Interchangeable cylinder line that contains an internal Linear Resistive Transducer (LRT). It is ideal for applications where traditional magnetic position sensing is not acceptable. Additionally, the Accu A Series is conducive where variations in cylinder stroke and speed are required or where an application calls for continuous position monitoring.

Tube

The tube is hard coat anodized on the I.D. The hard coating is an electro-chemical process, which produces a very dense surface of aluminum oxide. This surface has extreme hardness (60 RC.), excellent wear and corrosion resistance, and low coefficient of friction.

End Caps

The end caps are accurately machined from (6061-T6) solid aluminum bar stock. They are anodized for corrosion resistance. Additionally, a recess on the piston-mating surface (at both ends) enables the air to work on a larger piston area for effortless breakaway.

Rod Bushing

The ACCU Series includes a graphite filled, cast iron rod bushing that is extra long in length. Graphite filled offers the best bearing surface when using a hard chrome plated piston rod. Cast iron provides maximum resistance against wear. The added length adds superior alignment and support of the piston rod as well as provides maximum load bearing support.

Rod Seal

The carboxylated nitrile with PTFE compound rod seal is self-lubricating and durable. The rounded lip design ensures proper sealing and long life.

Rod Wiper

The standard rod wiper construction is a highly durable polyurethane.

Piston Rod

High strength steel (100,000 psi minimum yield) piston rod has a ground, polished, and chrome plated surface. This surface provides maximum life for both the rod bushing and the seals.

Bushing Retainer

The bushing retainer allows cartridge removal (cylinder repair) without complete disassembly.

Tie Rods

The tie rods are 100,000 psi minimum yield steel for maximum holding power. They are roll formed for superior strength and engagement.

Piston Seal

The piston seal is a low friction carboxylated nitrile seal. The carboxylated nitrile is a PTFE compound that is used for self-lubricating. The U-cup seals are pressure activated and wear compensating.

Wear Band

The wear band is a stable, lubricating strip located on the piston. We separate the load bearing points by locating the wear band at the rear of the piston. This maximizes column strength at full extension.

Piston

The solid aluminum alloy piston is strong and durable.

Cushion Seal

The floating cushion seal design enables rapid stroke reversal by providing instantaneous full flow to the piston. Each cushion has a flush, retained adjustment needle.

Tube End Seal

The tube end seals are compression type and reusable.

Ports

Our enhanced port design enables the cylinder to work more efficiently. Through the use of precise machining depths and tool shape, we are able to smooth the flow path into and out of the cylinder.

Linear Resistive Transducer (LRT) Probe

The LRT is an anodized aluminum probe with a reinforced threaded flange and thread seal. The probe processes infinite resolution, with a non-linearity of ± 1 percent of full stroke. Furthermore, the probe is rated for 10 million cycles. Typical probe input is 10VDC (maximum voltage is 28VDC and maximum current draw is less than 2mA), input impedance required is 1 Mohm. The probe temperature rating is -40° to 250° F. Maximum velocity is 50"/sec.

Linear Resistive Transducer (LRT) Wiper

The LRT wiper is precision molded assembly that is rated for more than 1000 linear miles of travel.

3 Pin Connector

The customer friendly connector is supplied as standard on all Accu A Series cylinders. The connector has a universal 8 mm, 3 pin, Nano male connection.

Standard Specifications:

- Meets NFPA mounting dimension specifications
- Bore sizes from 1-1/2" through 8"
- Piston rod diameters from 5/8" to 1-3/4"
- Cylinder maximum pressure rating is 100 psi air
- Standard temperature -10° F to 165° F
- Probe Standard Temperature -40° F to 250° F
- NPTF ports
- Multitude of mounting options
- Continuous position sensing
- Easily repairable
- Extremely accurate:
 - Infinite resolution, linearity of ± 1 percent of full stroke,
 - $\pm .001$ " mechanical repeatability
- Electronic controllers available for dual set points and scalable analog output applications
- Quick connect (IP65) standard on all models

Standard ACCU A Series Mounts

Centerline Mounts

X0 Mount
Basic No Mount
1-1/2" to 6" Bore

X1 Mount
Extended Tie Rods – Both Ends

X2 Mount
Extended Tie Rods – Cap End

X3 Mount
Extended Tie Rods – Head End

F1 Mount
Head Rectangular Flange
1-1/2" to 6" Bore

F2 Mount
Cap Rectangular Flange
1-1/2" to 6" Bore

E3 Mount
Head Square
8" Bore Only

E4 Mount
Head Square
8" Bore Only

Pivot Mounts

P2 Mount
Detachable Clevis

P4 Mount
Detachable Eye

T1 Mount
Head Trunnion

T2 Mount
Cap Trunnion

T4 Mount
Intermediate Trunnion

Foot Mounts

S1 Mount
Angle Mount

S2 Mount

Sleeve Nut

How to Order

X0 AAS K - 01 A 3 C - F AA 2 - 4

Mount

- X0* = Standard No Mount
- X1 = Extended Tie Rods Both Ends
- X2 = Extended Tie Rod Cap End
- X3 = Extended Tie Rod Head End
- F1* = Front Flange
- F2* = Rear Flange
- E3** = Head Square Flange
- E4** = Cap Square Flange
- P2 = Detachable Clevis
- P4 = Detachable Eye
- T1 = Head Trunnion
- T2 = Cap Trunnion
- T4*** = Mid Trunnion
- S1 = Angle Mount
- S2 = Side Lug Mount
- S4 = Bottom Tapped
- SN* = Sleeve Nut
- * 1-1/2" - 6" bores
- ** 8" bore only
- ***Must specify XI dimension

Type

AAS = ACCU A Series

Bore

- K = 1-1/2" R = 4"
- L = 2" T = 5"
- M = 2-1/2" U = 6"
- P = 3-1/4" W = 8"

Standard Full Inches of Stroke

- 01 = 1" Stroke
- 02 = 2" Stroke
- 03 = 3" Stroke
- 04 = 4" Stroke
- 06 = 6" Stroke
- 08 = 8" Stroke
- 12 = 12" Stroke
- 18 = 18" Stroke (maximum)

Note: Non-standard stroke lengths increase lead time.

Fractional Inches of Stroke

- A = 0" I = 1/2"
- B = 1/16" J = 9/16"
- C = 1/8" K = 5/8"
- D = 3/16" L = 11/16"
- E = 1/4" M = 3/4"
- F = 5/16" N = 13/16"
- G = 3/8" O = 7/8"
- H = 7/16" P = 15/16"

Note: Transducers are only available in the "Standard" strokes listed. Non-standard full inch or fractional strokes will use the smallest available "Standard" length transducer to cover the entire stroke. In these cases, the analog output will be less than 10V at full stroke.

Rod End Codes

- 1 = Style #1 Standard Male Thread
- 2 = Style #2 Optional Male Thread
- 3 = Style #3 Optional Female Thread
- 4 = Special Standard Rod Diameter (must specify threads)
- 5 = Special Oversize Rod Diameter (must specify threads)
- 6 = #1 Oversize Rod Diameter
- 7 = #2 Oversize Rod Diameter
- 8 = #3 Oversize Rod Diameter
- U = Male Coupling Rod End Standard Rod Diameter
- V = Male Coupling Rod End Oversized Rod Diameter

Position of the Connector Cable

- 1 = Position 1
- 2 = Position 2
- 3 = Position 3
- 4 = Position 4

Magnet

- 0 = No Magnet
- 2 = Reed Magnet

Options

- AA = No Options
- BA* = Bumpers Both Ends
- BC* = Bumper Cap Only
- BH* = Bumper Head
- CT = Composite Tube
- CZ = Composite Bushing

Accu A Series Piston Rod Assembly How To Order

Note: Options listed are ones that apply to a piston rod assembly only.
Model number is set up to use option code supplied with original cylinder or with any above.

Repair Kit How To Order

A Repair Kit includes all seals and a bushing.

Note: Options listed are ones that apply to a repair kit only.
Model number is set up to use option code supplied with original cylinder or with any above.

Seal Kit How To Order

A Seal Kit only includes the seals.

Note: Options listed are ones that apply to a seal kit only.
Model number is set up to use option code supplied with original cylinder or with any above.

Transducer Kit How To Order

The **Accu M Series** is a stainless steel body air cylinder that contains an internal Linear Resistive Transducer (LRT). It is ideal for applications where traditional magnetic position sensing is not acceptable. Additionally, the Accu M Series is conducive where variations in cylinder stroke and speed are required or where an application calls for continuous position monitoring.

Piston Rod

The type 303 stainless steel piston rod is ground, polished, and roller burnished for a hard, mirror finish that will ensure long, corrosion-free longevity. (Note: The 1-1/16" bore is chrome plated 1050 steel.)

Rod Thread

Roll-formed rod threads (at both ends) ensure a durable customer-end connection as well as piston to rod connection.

Rod Bushing

Oil impregnated sintered bronze rod bushing provides excellent wear resistance and anti-friction qualities for smooth operation and long life.

End Caps

The end caps are made from a high strength aluminum alloy.

Ports

Unrestricted (full-flow) ports in conjunction with rectangular slots on the piston-mating surface (at both ends) enable the air to work on a larger piston area for effortless breakaway (even at low pressures).

Tube

The type 304 stainless steel tube, drawn and polished to a micro-inch finish on the I.D., enables low friction and longevity.

Crimp

The cylinder body is attached to the end caps using innovative assembly equipment that ensures a consistent and reliable double rolled-in crimp.

Piston

High strength aluminum alloy piston. Piston rod connections are threaded (roll-formed threads), sealed with Loctite Threadlocker®, torqued, and staked for a solid, leak-proof connection.

Threadlocker® is a registered trademark to the Loctite Corporation.

Piston Seals

Low friction Buna N "U" cup pistons seals are wear compensating for millions of maintenance free cycles.

Rod Seal/Wiper

The low friction Buna N "U" cup rod seal is wear compensating to ensure longevity.

Cylinder Lubrication

Pre-lubricated with our specially formulated oil based compound for extensive maintenance free performance.

Linear Resistive Transducer (LRT) Probe

The LRT is an anodized aluminum probe with a reinforced threaded flange and thread seal. The probe processes infinite resolution, with a non-linearity of ± 1 percent of full stroke.

Furthermore, the probe is rated for 10 million cycles. Typical probe input is 10VDC (maximum voltage is 28VDC and maximum current draw is less than 2mA), input impedance required is 1 Mohm. The probe temperature rating is -40° to 250° F. Maximum velocity is 50"/sec.

Linear Resistive Transducer (LRT) Wiper

The LRT wiper is precision molded assembly that is rated for more than 1000 linear miles of travel.

3 Pin Connector

The customer friendly connector is supplied as standard on all Accu A Series cylinders. The connector has a universal 8 mm, 3 pin, Nano male connection.

Standard Specification:

- 303 stainless steel piston rods are standard (except 1-1/16" bore)
- 304 stainless steel cylinder tube
- Aluminum head and caps
- Maximum pressure rating is 100 psi air
- Seven bore sizes – 1-1/16" – 3"
- Rod wipers
- Cylinder standard temperature -10° F to +165° F
- Probe Standard Temperature -40° F to +250° F
- Continuous position sensing
- Extremely accurate:
 - Infinite resolution, linearity of ± 1 percent of full stroke, $\pm .001$ " mechanical repeatability
- Electronic controllers available for dual set points and scalable analog output applications
- Quick connect (IP65) standard on all models

MLRT Circuit Diagram

Connector Pin Assignments

Note: Control Module Units sold separately can have scalable output of 4-20 mA or 0-10 VDC and input of 120 VAC or 12-24 VDC.

Connector Cable part number N99-1120

NOTE: SPECIAL CRISS-CROSS WIRING

How To Order

10 AM 1 - 06 A - 01

Cylinder Bore
 10 = 1-1/16"
 15 = 1-1/2"
 20 = 2"
 25 = 2-1/2"
 30 = 3"

Cylinder Type
 AM = ACCU M Series

Cylinder Mounting
 1 = Front Nose
 2 = Rear Pivot
 5 = Block Mount

Options
 00 = No Options (or leave blank)
 01 = Bumpers
 Note: Bumpers add .125" to OAL per end.

Fractional Inches of Stroke
 A = 0"
 I = 1/2"

Standard Full Inches of Stroke
 01 = 1" Stroke
 02 = 2" Stroke
 03 = 3" Stroke
 04 = 4" Stroke
 06 = 6" Stroke
 08 = 8" Stroke
 12 = 12" Stroke
 18 = 18" Stroke (Maximum)

Note: Transducers are only available in the "Standard" strokes listed. Non-standard full inch or fractional strokes will use the smallest available "Standard" length transducer to cover the entire stroke. In these cases, the analog output will be less than 10V at full stroke.

Note: Non-standard stroke lengths will increase lead time.

Consult factory for fractional stroke information.

Transducer Kit How To Order

M72-E02M - 01A

Type
M72-E02M = ACCU A & ACCU M
Transducer

Cylinder Stroke
01A = 1.000
02A = 2.000
03A = 3.000
99A = 99.000

The **Accu Slide Series** is a pneumatic slide that is driven by a cylinder that contains an internal Linear Resistive Transducer (LRT). It enables position feedback capability for applications where space is limited and when a load must be guided to prevent rotation.

A. Body:

Hardcoat Anodized Aluminum(6061-T6511)

Lightweight, durable, high strength to weight ratio.

Standard Dowel Location Holes

Allows precision mounting.

Multi-Surface Mounting Holes

Flexible, easy access for mounting.

B. Air Cylinder (ACCU M Series):

Standard Stainless Steel Body and Rod

Corrosion resistant.

Standard w/ Magnetic Piston

Sensing applications (Hall, Reed or Prox) added as required.

C. Alignment Coupler:

Isolates Piston Rod from side loading

Maximize life of cylinder, 360 degrees of float.

D. Tooling Plate:

NuMate Universal Mounting Pattern

Standardized mounting system, eliminates custom transition plates.

Holes Drilled/Tapped and C'bored from the opposite side

Easy mounting.

Standard Dowel Locating Holes

Precision mounting.

E. Guide Shafts:

Hardened Steel to Rc 60 - 65

Long life.

Hardened Stainless Steel to Rc 50 - 55

Long life.

Precision Ground & Polished to 15uRMS

Smooth cycling/low breakaway.

Pilot Mounted to Tooling Plate

Maximum rigidity.

Large Diameters

Increased load capacity.

F. Bearings: (Three Choices)

Four Precision Linear Ball Bearings Sealed with Rod Wipers

Safe guarding against dirt & contamination.

Self-Aligning

Reducing wear, maximizing both, load capacity and long life.

Four Sintered Bronze Sleeve Bearings Oil Impregnated

Self lubricating.

High Pv Rating

Long service life.

Four Frelon® Compounded PTFE Low Friction

Longest wear life.

Maintenance Free

Self lubricating.

G. Bumpers: (Standard)

Polyurethane Material

Durable and long lasting.

Integrated into body Design

Reduces shock loading on extend & retract.

Preliminary Rod Wiper

Removes larger contamination from Guide Shafts.

H. Adjustable Shaft Collars: (Standard)

Extend Stroke Adjustment

Flexibility.

The **Accu Gantry Series** is a pneumatic gantry slide that is driven by a cylinder that possesses an internal Linear Resistive Transducer (LRT). It enables position feedback capability for applications that require fundamental gantry motion.

The design centers around a moving carriage between two fixed tool bars. The carriage is supported and guided by four bearings and two hardened guide shafts.

A. Carriage:

Hardcoat Anodized Aluminum

Lightweight, high durability. NuMate Direct Mounting Pattern NuMate is a patented mounting system eliminating the need for adaptor/transition plates. Slide, gantries and grippers mount directly to the GS gantry.

B. Air Cylinder:

Standard Stainless Steel Body and Rod

Corrosion resistant.

Standard Magnetic Piston

Sensing options Reed, Hall, Prox sensors, able to be added in field.

C. Alignment Coupler:

360 Degrees of Float

Isolates cylinder, eliminates destructive side load, maximizes life.

D. Tool Bars:

Standard Dowel Locating Hole and Slot

Accurate mounting and positioning.

Standard Tapped Holes for Shock Absorbers

Accepts industry standard shocks.

E. Guide Shafts: (Two Choices)

Hardened Steel

Hardness Rc 60-65, long life.

Hardened Stainless Steel

Hardness Rc 50-55, corrosion resistant.

Precision Ground and Polished 15u RMS

Smooth cycling, low breakaway.

Large Diameter

Increased load capacity.

Pilot Mounted to Tool Bar

Maximum rigidity, increased strength.

F. Bearings: (Two Choices)

Four Linear Ball Bearings

Greatest load capacity, self-lubricating, built-in seals and wipers, self-aligning.

Four Frelon® Compounded PTFE

Self-lubricating, self-aligning, long service life, ideal for cleanroom.

G. Stroke Adjustment Screws:

Standard Extend and Retract

Fine adjustment for carriage travel.
