How to Order

World Thread™ Fittings

Fitting Series

INWB = World Thread™ Inch Tube (All Brass)
NWB = World Thread™ Metric Tube (All Brass)

Fitting Style

103 = Straight
109 = Swivel Elbow
109E = Extended Swivel Elbow
114 = Swivel Branch Tee
116 = Swivel Run Tee

INWB

103

104

022

Options

(blank) = Buna-N O-ring
F = FKM O-ring

INW Thread Size

020 = 1/8"
021 = 1/4"
022 = 3/8"
023 = 1/2"

NWB Thread Size

000 = 1/8"
001 = 1/4"
002 = 3/8"
003 = 1/2"

* Tube Size

Inch

108 = 1/8"
532 = 5/32"
104 = 1/4"
516 = 5/16"
308 = 3/8"
102 = 1/2"

Metric

004 = 4mm
005 = 5mm
006 = 6mm
008 = 8mm
010 = 10mm
012 = 12mm

* See Fitting Style Charts on pages 3 – 6 for available Tube and Thread Configurations.

- Pressure Rating to 265 psi
- Temperature Range:
-20 °F to 176 °F (Buna-N O-ring)
-20 °F to 230 °F (FKM O-ring)
- Tube Diameter:
1/8" to 1/2"
4mm to 12mm
- Thread Size: 1/8" to 1/2"

Numatics' World Thread™ IN Fittings provide extreme versatility in use, which no longer requires the management of different fittings for different thread types or application.

- Extremely versatile – One fitting design for multiple thread types
- Rapid assembly – Requires fewer turns to tighten and seal
- Reusable – Fittings can be used several times without gasket deterioration
- Reliable seal – Helical thread profile and PTFE gasket ensure proper seal
- Maximum working pressure: 265 PSIG at 68 °F (18 bar at 20°C)
- Conductor compatibility – Nylon, Polyurethane, Polyethylene

Numatics' World Thread™ is designed with a helical thread design that represents the envelope for the profile of the NPTF, ISO 228/1 (BSPP), (G-Tap), ISO 7/1 (BSPT), (JIS B 0202) and (JIS B 0203) thread types. In conjunction with the thread design the seal between the male and female threads is created with a PTFE gasket, housed in a groove at the rear of the thread. This gasket seal meets UNI 571-65 standards.

How to Order

NPTF/Inch Tube Fittings

Fitting Series	INB	109	104	022	Options
INB = NPTF/Inch Tube (Brass Release Ring)					(blank) = Buna-N O-ring
¹ IN = NPTF/Inch Tube					F = FKM O-ring
Fitting Style					Thread Size
100 = Union		¹ 118 = Plug			000 = No Thread
101 = Bulkhead Union		¹ 119 = Double Male Union			0036 = 10-31 UNF
103 = Male Connector		¹ 120 = Stem Adapter			020 = 1/8 NPTF
105 = Female Connector		121 = Reducer			021 = 1/4 NPTF
106 = Union Elbow		122 = Single Banjo			022 = 3/8 NPTF
107 = Fixed Elbow		123 = Double Banjo			023 = 1/2 NPTF
109 = Swivel Elbow		¹ 124 = Single Manifold			
109E = Extended Swivel Elbow		¹ 125 = Double Manifold			² Tube Size
110 = Union Tee		131 = Union Y			108 = 1/8"
114 = Swivel Branch Tee		132 = Male Y			532 = 5/32"
116 = Swivel Run Tee					104 = 1/4"
					516 = 5/16"
					308 = 3/8"
					102 = 1/2"
					000 = No Tube

¹ These fittings are only available in IN Fitting Series. All other styles are only available in INB Fitting Series.

² See Fitting Style Charts on pages 8 – 13 for available Tube and Thread Configurations.

- Pressure Rating to 265 psi
- Temperature Range:
-20 °F to 176 °F (Buna-N O-ring)
-20 °F to 230 °F (FKM O-ring)
- Push-in fittings with NPTF threads
- PTFE thread sealant
- Tube Diameter: 1/8" to 1/2"
- Thread Size: 10-32 UNF to 1/2 NPTF

Dimensions: inches

113 = Swivel Branch Tee	¹ 124 = Single Manifold					005 = 5mm
	¹ 125 = Double Manifold					006 = 6mm
						008 = 8mm
						010 = 10mm
						012 = 12mm
						000 = No Tube

¹ These fittings are only available in N Fitting Series. All other styles are only available in NB Fitting Series.

² See Fitting Style Charts on pages 15 – 19 for available Tube and Thread Configurations.

- Pressure Rating to 265 psi
- Temperature Range:
-20 °F to 176 °F (Buna-N O-ring)
-20 °F to 230 °F (FKM O-ring)
- Push-in fittings with G threads
- Tube Diameter: 4mm to 12mm
- Thread Size: M5 to 1/2 G

Dimensions: mm

OEM Flow Controls

Features

Knob adjust, Screwdriver adjust

Specifications

Temperature Range: 0 °F to 176 °F

Maximum Operating Pressure: 265 psi

Materials of Construction

Body: Brass, Nickel-plated

Screw: Stainless Steel

Seals: Buna-N

Release Button: Oil or Brass

Adjustment Needle: Brass

Dimensions: inches

Flow Controls

Features

Body swivels 360°, provides accurate speed control in a compact size and eliminates need for fitting

Specifications

Temperature Range: 0 °F to 160 °F
Maximum Operating Pressure: 175 psi (12 bar)

Materials of Construction

Body: Anodized Aluminum
Cartridge: Nickel-plated Brass
Screw: Stainless Steel
Spring: Stainless Steel
Seals: Buna-N

Dimensions: inches

IN530 Slide Valve

Features

The IN530 Slide Valve allows easy isolation of downstream components by dumping circuit pressure.

Specifications

Temperature Range: 0 °F to 160 °F
Maximum Operating Pressure: 150 PSIG (10 bar)
Pipe Sizes: 1/8, 1/4, 3/8 1/2 NPTF

Materials of Construction

Sleeve: Aluminum
Body: Chrome-plated Brass
Seal: Buna-N
Snap Ring: Steel

Dimensional Drawings - M Series Metal Air Silencers

Application

The M Series Muffler softly exhausts air and disperses it over a 360° pattern. Constructed of a corrosion resistant metal, it can withstand shock and continuous, heavy-duty use under many conditions. This muffler is ideal for use on the 22/32 Series Solenoid Soft Start Quick Exhaust Valve, Lockout Valves, Valve Exhaust Ports, Single Acting Cylinders, and many other applications.

SSM Series Stainless Steel Air Silencers

Application

The SSM Series Muffler is constructed with 300 Series stainless steel. Resistance to atmospheric corrosion, sterilizing solutions, organic chemicals, and many inorganic chemicals makes this a terrific product for dairy and food plants. The SSM Series Muffler softly exhausts air and disperses it over a 360° pattern. Because of its heavy-duty construction, it can withstand shock and continuous cycling.

Dimensional Drawings - P Series Porous Bronze Air Silencers

Application

The P Series Muffler is perfect for limited space applications due to its compact size. This silencer can be used to muffle air valve exhaust noise, intake filtration, coalescing of oil mist exhaust, pressure or vacuum equalization, or on any other liquid vapor.

E Series Polyethylene Air Silencers

Application

Combining a sturdy nylon thread with a polyethylene body, the E Series Silencer gives a low-cost, lightweight alternative to heavier, metal-based mufflers while reducing decibel levels to an OSHA-approved level. It is perfect for robotic arm applications, low-traffic or enclosed areas, or where cost is of primary concern.

1	A6MN	2.32	2.25 (57.2)	2.50 (63.5)	1.31 (33.3)

Application

The Numatics Bronze Speed Control Muffler provides infinite metering of air flow. The sintered bronze is encased by an outer metal shroud. With linear adjusting capability, the speed of the cylinder can be decreased by adjusting the integrated screw. When optimal exhaust rate is reached, the locknut may be adjusted to prevent accidental adjustments due to vibration or other means. Maximum Operating Pressure: 300 psi; Temperature Range: 35 °F to 300 °F (1.7 °C to 149 °C).

Application

The Polyethylene Speed Control Muffler is designed to give fine adjustment to the low end of the flow range, followed by more coarse control as flow is increased toward the maximum. The body is made of highly versatile and cost-effective nylon. The adjusting screw is made of high tensile steel and is coated with electroplated zinc. The S Series Muffler reduces decibel levels to an OSHA-approved level.

Dimensions: inches (mm)

Dimensional Drawings - Breather Vent Silencer

Model Selection

Port Size	Models		Cv	A	B
	NPT	BSPT			
1/8	B1MN	B1MB	0.44	0.44 (11.2)	0.44 (11.2)
1/4	B2MN	B2MB	0.65	0.63 (16.0)	0.56 (14.2)
3/8	B3MN	B3MB	1.12	0.75 (19.1)	0.68 (17.3)

1-1/2	B8MN	B8MB	12.72	1.50 (38.1)	2.00 (50.8)

Application

The Breather Vent Silencer offers some noise reduction, but is better suited for keeping contaminant out of valve exhaust ports, single-acting cylinder ports, or any other threaded port open to atmosphere which needs flow relief. It is also used on gear boxes, storage tanks, or wherever pressure equalization is needed. The Breather Vent Silencer is compact and inexpensive. Maximum Operating Pressure: 150 psi; Temperature Range: 35 °F to 300 °F (1.7 °C to 149 °C).

C Series Inlet Filter Strainer

Model Selection

Port Size	Models NPT	Cv	A	B
1/8	C1MN	0.31	1.25 (31.8)	0.43 (10.9)
1/4	C2MN	0.78	1.50 (38.1)	0.56 (14.2)

1/2	C4MN	2.0	2.00 (50.8)	0.88 (22.4)

Application

Ideal for air, oil, or water, the C Series Inlet Filter Strainer is compact and lightweight—perfect for point-of-use application. It features a brass fitting which contains a cone-shaped, sintered bronze, 40 micron filter. It is used as a prefilter, which eliminates bulk contamination from air lines, extending the life of filter elements and other downstream components.

Dimensional Drawings - QR300071 Tube Cutter

Model Number	Height (H)	Length (L)
QR3000 71 00	0.98	3.11

Application

This tool will cut all composite tubes (e.g. nylon, PTFE, polyurethane, braided polyethylene, soft rubber, etc.) from 1/8" to 1/2" diameter inclusive. It is designed to give a clean cut at right angles to tube axis. A spring maintains the cutter in the closed position.

Polyurethane 95 Tubing

Application

Polyurethane tubing is ideal for compressed air and vacuum systems. This rigid wall tubing is compatible with push-to-connect pneumatic fittings.

Features

Has excellent abrasion resistance and shape retention while working in high humidity and low temperatures. Withstands salt water, ages well, has good vibration absorption, and excellent tear resistance.

Specifications

- Vacuum Rating: to 28 inHg
- Temperature Range: -40 °F to 165 °F

Polyurethane Tubing for Numatrol® Series

Application

This highly flexible tubing allows easy connection to “barbed” fittings with sharp bends possible in less than one inch. Many Numatrol® installations that previously required the use of nylon tubing for high pressure, clamp functions for example, can now be easily accomplished with this tubing.

Features

Numatrol® polyurethane tubing offers superior performance to other composite tubing with regard to kink resistance. Low temperature flexibility, higher working pressures, and resistance to ambient ozone oil, grease, fuels and most chemicals.

Specifications

- Vacuum Rating: to 28 inHg
- Temperature Range: 0 °C to 200 °C
- Shore 83 A

Low Density Polyethylene Tubing

- Lightweight and flexible
- Superior dielectric properties
- Easily heat sealed
- Tasteless and odorless
- Impermeable to gases and moisture

LDPE is extruded to close tolerances from high quality, low density polyethylene resins. All colors except red comply with FDA regulation 21 CFR 177.1520(c) for food contact applications. LDPE has a water absorption rate of 0.15% per ASTM D-570 standards.

Dimensional Drawings - EDV Series Electronic Drain Valves

EDV-04-110AC pictured

Application

Eliminate the manual draining of air lines with the EDV Series Electronic Drain Valve from Numatics. The EDV Series Valve is designed to remove condensation from filters, receiver tanks, separators, drip legs, drain traps, and dryers in electronically controlled intervals. The EDV valve is available in 1/4, 3/8, and 1/2 sizes. The large orifice allows even the largest rust and pipe scale particles to be easily expelled. Standard model includes a 110 Volt AC solenoid, 6ft (2m) power cord, and grounded plug. An EDV valve can be installed virtually anywhere.

Specifications

Valve

- Function: 2-Way, NC, Solenoid Valve
- Valve Design: Pilot Operated Diaphragm Valve
- Port Sizes: 1/4, 3/8
- Orifice: 5/16" (8mm) 1.12 Cv; 1/2" (12mm) 2.45 Cv
- Operating Pressure: 20 – 300 PSIG (1.3 – 20 bar)
- Solenoid: Continuous Duty
- Mounting: Any Position
- Body Material: Brass

Timer

- Material: Plastic Polyamid
- Interval Timer: 1 – 45 min.
- 'On' Timer: 0.25 – 25 sec.
- Voltage: 12 – 230 V AC/DC
- Frequency: 50/60 Hz
- Power Rating: 10 Watt
- Enclosure: NEMA 4/IP65
- Ambient Temp: 130 °F (55 °C)

Lights

- Left Indicator: Power On
- Right Indicator: Solenoid Engaged

Dimensional Drawings - PS180 Pressure Switches

Application

Numatics PS180 is a line of pressure switches designed for accurate indication that proper system pressure is being achieved. Available in 1/8 or 1/4 threads, it is easily incorporated into an air system using a FlexiBlok® Diverter Plate.

Featuring a rugged housing made from zinc-coated steel, the PS180 is designed for industrial multi-million cycle life applications. The 4-pin connector plug is included and contains a key way of preventing accidental misconnection. Pressure adjustment is tamper resistant, hindering unauthorized changes. It can be wired in either normally open or normally closed configurations and includes a case ground pin.

Specifications

Contact Rating: 4A @ 250 V AC
 Protection: IP 65, Terminals IP00
 Maximum Operation: 200/min
 Temperature Range: 0 °F to 190 °F (-15 °C to 85 °C)
 Maximum Pressure: 300 PSI (20 bar)
 Maximum Voltage: 250 V AC (200 DC)
 Hysteresis Adjustment: 15%
 Connector Material: Polyamid
 Diaphragm Material: Buna-N
 Housing Material: Zinc-plated Steel

NOTE: Use G suffix for gold-plated terminals (for applications below 50 mA), ex: PS180BAN02G

PS182 Pressure Switches

Application

Numatics PS182 is the most rugged of the Numatics Pressure Switches. Available in 1/8 or 1/4 NPT and BSPP threads, it is easily incorporated into an air system using a FlexiBlok® Diverter Plate or Diverter Block.

The unique 12mm Micro Connector makes it simple for electrical connection. The knurled knob with tamper resistant hex screw makes it the easiest pressure adjustment on the market. It can be wired in either a normally open or normally closed configuration.

Specifications

Hysteresis Adjustment: 10%
 Pressure Ranges: 2 – 10, 6 – 30, 20 – 130
 Maximum Pressure: 600 psi
 Set Point Tolerance: +/- 1 psi or 5%
 *Contact Rating: 4A
 Diaphragm Material: Buna-N
 Maximum Operating Cycles: 200/min
 Temperature Range: -40 °F to 250 °F
 (-40 °C to 121 °C)

Voltage Range: 12 V DC to 250 V AC
 Sealing/Protection: IP 65
 Housing Material: Brass
 Electrical Connection: 3-Pin Micro (12mm)

*Comes standard with gold-plated contacts.
